MountainBiking

Slovenia with its forest landscape and mountains offers most attractive tours, guided mountain bike tours either cross-country or downhill, learning of mountain bike technique in MTB Parks with top quality mountain bikes and protection gear. We offer various tours and our team is ready to take you ride.

MOUNTAIN BIKE TOURS

When riding with our friends and discovering the most hidden and remote trails and the best view points,, we often do not know which way to choose. Wher could the best single trails be? How do we get there? Where to start? And at last, when we are back in the valley, we find out that another way might have been better. Sounds familiar?

MTB and trails are made for pleasure. If you have enought time to explore where the best one might lie, do so, but if you only want to enjoy riding our solution is: local guide + bike shuttle.

A variety of landscapes and an almost unlimited number of epic single trails can be found in the small area of Slovenia. Years of riding, guiding and discovering trails have led us to prepare a tours with the best single trails in most beautiful biking regions in our coutry.

GUIDED GROUP TOURS

The tours are organized for small groups, sized between 6 to 15 participants, which guarantees a personal attitude, depending on different riding skills and phyisical condition. Besides tour organiser, two MTB guides travel with the group – cycling with guests and driving the support van, which is equiped with tools, some spare parts and the first aid equipment.

CUSTOM TOURS

We are delighted to work with groups of friends, clubs, families and businee associates who want to take a mountain bike tour together. Together with your group organiser we can create a custom tour that caters for the special wishes of the participants. The price of the custom tour is determined by the number of guests, the lenght of the trip, accomodations and meal costs and the amount of research involved.

FREERIDE

The heights and slopes of the mountains are ready made for pleaasure. The toil of ascent is avoided since the transportation is arranged to the 'real' heights where the adrenalin rush begins on the ride down through abondened forest roads and cart tracks to the valley. These paths are not marked, but our best local 'extremists' will be pleased to escort your downhill. Best places to ride: Karavanke, Julian Alps, Velika Planina, Krvavec, Ljubljana area, Gorjanci, Nanos,…Slovenia is also full of great MTB bike parks.

Such as: Kranjska Gora, Maribor, Javornik, Kanin,…
